Disaster Recovery Planning in the Canadian North: A Practical Guide for Businesses and Communities

 from Tamarack Computers

Please share some information to download this whitepaper. Name: Company: e-mail: Comments:

Like every organization in Canada's North, your business or community must deal with an unreliable power supply. That's just a part of life in our great region. But a massive power outage could have a devastating effect on your operations leading to lost productivity, reduced citizen service, and decreased revenue for your business or community. That's why it's absolutely essential for your organization to build a workable disaster recovery plan. Download a new e-book from Tamarack Computers to learn more. In Disaster Recovery Planning in the Canadian North: A Practical Guide for Businesses and Communities, you'll find out:

- The staggering cost of business downtime, according to a Symantec survey.
- Two reasons why creating a disaster recovery plan is absolutely essential in the North.
- Three questions to ask yourself as you choose your disaster recovery technology.
- Which three types of data backup are often appropriate for organizations in the North.
- Five criteria for choosing your IT services provider.

Just provide your information above, and you'll be able to download this free resource within seconds.
